Projects

LAWATA – Crowdfunding & Investment Platform (React, Vite, GSAP)

- Built a full-stack web app enabling transparent crowdfunding with risk awareness.
- Designed user protection workflows that increased user trust and retention.
- Conducted testing and user feedback sessions to refine usability.

Fewes – Ethiopian Meal Kit Delivery Service (React, Node.js, REST API)

Fewes - Ethiopian Meal Kit Delivery Service | Modern web app for authentic Ethiopian cuisine with meal planning, menu browsing, and subscription services

- Designed and developed a modern meal subscription platform for Ethiopian cuisine.
- Implemented multi-step workflows, API integration, and optimized state management.
- Created a culturally inspired, responsive UI for improved user engagement.

Synth – E-Commerce Platform (PHP, MySQL, JavaScript)

About A modern, responsive e-commerce platform for premium leather products featuring jackets, bags, and belts. Built with HTML, CSS, JavaScript, and PHP with MySQL database integration.

- Built a responsive e-commerce site for premium leather products.
- Implemented authentication, order tracking, and dynamic product management.
- Applied SEO and performance optimizations for faster load times and better UX.

Other Projects:

OpenAI Translator (Python, OpenAI API) · Mini Expert System (Prolog)
